

BI Developer

June 2021

Do you have deep knowledge of Business Intelligence platforms and an analytical way of thinking? Do you want to be involved in a large analytics ecosystem? Paloservices is looking for a candidate like you!

We are looking for a Business Intelligence (BI) Developer to create and manage BI and analytics solutions that turn data into knowledge. Our ideal team member must be analytical and an excellent communicator with the proper background in data & business analysis and a problem-solving aptitude. You will operate in a high-end environment with state-of-the-art systems and approaches, joining a team of specialists. Ultimately, you will enhance our business intelligence system to help us make better decisions.

Responsibilities

- Translate business needs to technical specifications
- Evaluate and improve existing BI systems (Microsoft Power BI)
- Maintain and support data analytics platforms (Amazon Athena)
- Collaborate with teams to integrate systems
- Develop and execute database queries and conduct analyses
- Create visualizations and reports for requested projects
- Develop and update technical documentation
- Stay plugged into emerging technologies/industry trends and apply them into operations and activities

Requirements

- B.Sc. or higher in Computer science/engineering or relevant field
- Proven experience as a BI Developer (industry experience is preferred)
- Experience in BI technologies (e.g. Microsoft Power BI, Tableau)
- Experience in Monitoring Platforms (Grafana)
- Experience in Data Visualization Platforms (Kibana)
- Background in data warehouse design and data mining
- In-depth understanding of database management systems and ETL (Extract, transform, load) frameworks
- Deep knowledge of SQL queries
- Proven abilities to take initiative and be innovative
- Analytical mind with a problem-solving aptitude

Salary & Bonus

The company offers a very attractive package including bonus and other benefits.
