**About the Company**

ipQuants AG is a Schaffhausen, Switzerland based legal analytics SaaS company that empowers its users with data-driven strategic insights. Data-driven decision making is transforming the legal industry, and ipQuants is at the forefront of this transformation. We provide unique solutions to patent owners and patent attorneys, which in turn empower them to extract actionable strategic insights from millions of patents and other legal documents.

**About the Position**

As a **DevOps Engineer**, you will be directly involved in maintaining and further developing the infrastructure of the ipQuants Stack, our proprietary SaaS software platform. You will work closely with the CTO and the founders of ipQuants, and your main focus will be to build next-generation legal analytics solutions that empower our users to obtain the insights they need to achieve their goals. We are offering a full-time position with a competitive salary, bonus program, and other benefits.

Your main Responsibilities are:

- Maintain and extend our existing infrastructure (on Premise and Cloud)
- Responsible for deploying, automating, maintaining and managing the production system, to ensure the availability, performance, scalability and security of productions systems.
- Maintain the monitoring and alerting systems
- Responsible for the planning and implementation of the lifecycle management of the infrastructure

If this sounds interesting, we would really love to have a chat! Please share your resume and any other information you think is relevant and we will get back to you. Please forward to [Vv@ipQuants.com](mailto:Vv@ipQuants.com).
